a catalytic converter for deriving heat provided by said internal combustian engine;

an open system including said catalytic converter coupled to an inlet for receiving ambient pullutants.

REMARKS

Claims 21 and 22 are added prior to first office action and are patterned along the lines of claim 18 directed to the ambient pollutant processing features of the invention. Antecedent support therefor is found at least at page 17, beginning at line 14.

Respectfully submitted,

Conrad O. Gardner

Applicant
